Project work session

CEVE 543

2026-10-30

This Friday is a work session on your final project, with your laptop. Your selection proposal is due today; the scoping meetings with me are the week of Nov 2, not this week. Use the rest of the session to fit your first course method to your data and to get your tool running, since the checkpoint on Wed Nov 18 asks for both.

See the final project page for the deliverables and deadlines.
