

SIMULATING DEPENDENT EXTREMES

An aerial photograph of a residential neighborhood that has been completely inundated with floodwater. The water is a murky, brownish-grey color, covering the streets, lawns, and yards. Numerous houses with various roof colors (brown, grey, red) are visible, some with water reaching up to their windows. Trees are scattered throughout the landscape, their green foliage partially submerged. A few cars are visible on the flooded streets. In the background, a river or larger body of water is visible, along with more trees and a distant shoreline.
