

SYNTHESIS AND WRAP-UP

An aerial photograph of a residential neighborhood that has been severely flooded. The water is murky and covers almost all the ground, including streets, lawns, and yards. Numerous houses with various roof colors (brown, grey, red) are visible, partially submerged. There are many green trees scattered throughout the area. A few cars are visible in the water. In the background, a river or larger body of water is visible, along with more trees and a grassy area.
