

PCA AND K-MEANS ON REANALYSIS FIELDS

An aerial photograph of a residential neighborhood that has been completely inundated with floodwater. The water is a murky, brownish-grey color, covering the streets, lawns, and yards of numerous houses. The houses have various roof colors, including grey, brown, and red. Many trees are still standing in the water, their green foliage contrasting with the flood. In the background, a river or larger body of water is visible, along with more trees and a distant shoreline. The overall scene depicts a significant natural disaster.
