

SYNTHESIS AND WRAP-UP

An aerial photograph of a residential neighborhood that has been severely flooded. The water is murky and covers almost all the ground, including streets, lawns, and yards. Numerous houses with various roof colors (brown, grey, red) are visible, partially submerged. There are many green trees scattered throughout the area. A straight road runs vertically through the center of the image. In the top right corner, there is a green field, possibly a golf course, which is also partially flooded. The overall scene depicts significant flooding damage to a community.
