

QUANTILE MAPPING AND DELTA METHODS

An aerial photograph of a residential neighborhood that has been completely inundated with floodwater. The water is a murky, brownish-grey color, covering the streets, lawns, and yards. Numerous houses with various roof colors (brown, grey, red) are visible, some with water reaching up to their windows. Large green trees are scattered throughout the area, some with water reaching their lower branches. The background shows a continuation of the flooded area and a line of trees in the distance.
